

Hello friends

You should have heard by now that Adani has [committed significant money](#) to the destructive Carmichael mine project. They've also committed to use the dirty coal from phase one of the project internally, burn it for electricity within in the massive Adani Group.

Although there are still [some regulatory hurdles](#), **things are deadly serious**.

We cannot trust our politicians to do the right thing. Peaceful powerful direct action is required. It will get messy and we need your support.

We're 100% volunteer and 100% crowd-funded. This is a **big blatant request** to help us [reach our fighting fund goal](#) by Friday night.

Please [chip in TODAY](#) and share our [Facebook appeal](#).

Remember. Together We Will Win!
