

THE NORTHERN RIVERS NOW:

THE NORTHERN RIVERS IN 5 YEARS TIME IF WE DO NOT STOP CSG (Coal Seam Gas): (pictures from QLD – CSG sites)

CSG mining threatens so many aspects of our community: our water, our economy, our health, our agriculture, our environment, tourism, real estate value, roads condition, and our sense of place.

We all must talk, discuss and act now.

We cannot just ignore it; the danger to our lives is too great.

‘The future of the Northern Rivers is in our hands – this is our chance to seize this moment, make a stand, change history, and be proud of the legacy we leave to future generations.’

Please educate yourself on the issue of CSG Mining.
