

Hello Premier,

Today's announcement leaves much to be desired. The September announcements led me to believe that 40 new officers would be appointed to ensure compliance by mining companies involved with CSG. Drilling has been allowed to continue with virtually no government supervision. Now it seems we are to pay our taxes to fund a "liaison officer" to "ensure ready access to information"... This person will not be from the local community but be sent from the Bureau of Propaganda.

We don't need someone to tell us CSG is safe: we need someone to ensure that it is!

Stop trying to force on the people an environmentally damaging industry. Either you believe the public are idiots or you are: which is it?
