

URGENT!!

CHINDERAH JETTY - PUBLIC MEETING

TUESDAY 15TH OCTOBER 4PM-5.45PM
CHINDERAH SCOUT HALL, CHINDERAH RD

A Turning Point for the Tweed Riveror just another Wake?

This isn't just about a local boat jetty; this jetty will affect this iconic, coastal vista of Mt Warning over Chinderah Bay, enjoyed by thousands of locals and visitors, and will increase boat traffic and wake erosion across the whole river.

Does the community value this National Iconic vista in its relatively natural state, or should we allow this 40m jetty to intrude on this majestic vista?

In a shocking new report Council has identified 6kms of "Active and Severe" erosion threatening the Tweed Valley Way and Tumbulgum Rd, with few options except full rock revetment, and an estimated cost of \$9M.

The report states, "*As a result, there will be a significant stretch of the Tweed River estuary in which **full height rock armour** will have a **serious impact** on **visual amenity and environmental quality**".*

Does the community want more boating facilities and boating activity, and are we prepared to pay for this, in more ways than one?
